

## Shenzhen MCD Electronics CO.,Ltd

### Under vehicle inspector mirror MCD-V5

#### Product Introduction:

This product is the latest scientific and technological achievements. The rod is made of Aluminum alloy, which has some characteristic such as Silver white appearance, light weight, and high intensity. Product is suitable for police or security services to carry out the hidden-check, and to operate for a long time. Check-mirror can best retched, which greatly enhanced the applicability in varieties of environments. If necessary, the rod can be stretched quickly to have a check, and operator does not bend over.

The mirror is made of non-friable acrylic instead of ordinary glass plated mercury. The mirror tray is made of the special materials, which are not easy to aging and broken, and very durable. Products are equipped with adjustable hand-held rod. The range of rod length is from 46cm to 88cm. The unique folding design brings about space-saving and portability.

#### Product Parameters:

- 1.Mirror Size: diameter 30cm convex mirror
- 2.Connecting Rod Length:88cm
- 3.Supplementary lighting: superpower LED white light
- 4.Power:DC12V rechargeable battery
- 5.Net Weight: 1.75kg Gross Weight: 5.2kg
- 6.Package Size: 61\*39\*18cm

#### Feature and Application:

Economical, easy to carry, simple and clear, with three wheel to rotation. The rod can used in different space and rotation to different angle ,Easy to push. Especially Used for check under car, desk, stool etc. It is a very practical security tools

Quantity comes from **MCD** , Honesty shows all the world
